

When to Take an At-Home COVID-19 Test

At-home COVID-19 testing is one of our best tools to prevent the spread of the virus—alongside getting vaccinated and boosted. COVID-19 vaccines are highly effective at preventing infection, hospitalization, and serious illness, but no vaccine prevents 100% of infections. As the virus continues to evolve and cases are projected to spike seasonally, at-home testing helps you to determine if you have COVID-19 so you can prevent spreading it to others. Here are key scenarios and considerations to help you determine when you should take an at-home COVID-19 test and what to do when you get your results.
